Android Application Feature Updates

- 1.** Licensing on Android Apps
- 2.** Tricoder App Android - Update Vehicle location from App
- 3.** Barcode PRO- Edit Parts and Photograph Parts With Android App

18.2 Build Release Notes

1. Licensing on Android Apps

The Latest iteration of the android application now includes licencing. Similar to how "user licenses" work on Pinnacle Pro, now your Android app licenses can be shared across as many devices as needed and only the devices currently in use will count towards your license limit.

For example if you currently only have one android device with all the apps, this could now be split into a device for each app under the same cost.

1. Tricoder App Android - Update Vehicle location from App

We're increasing the utility of the Tricoder App to now include the ability to change the locations of vehicles.

This will function in the exact same way as moving parts Except changes in location will be shown in a different tab on the Tricoder import screen.

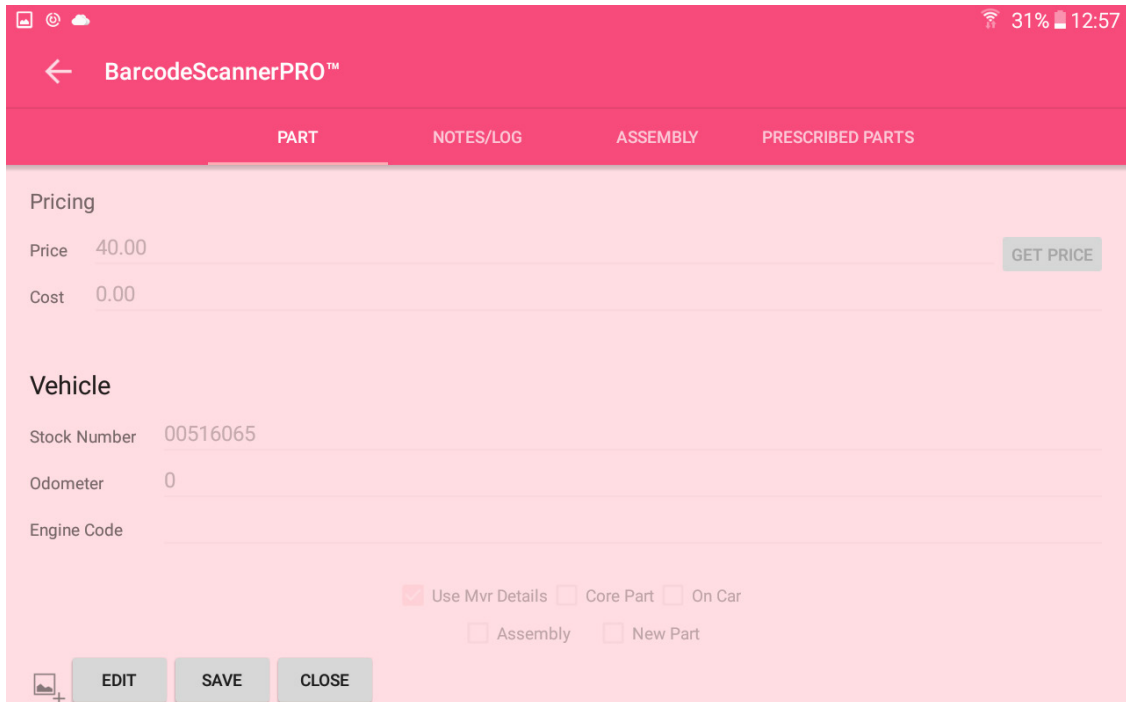

Tricoder Details				
Scanned Parts		Scanned Vehicles		
Current Location	Scanned Location	Stock No	New Location	Site
EBAY.1.1.1	EBAY.6.1.3	W0518954	<input checked="" type="checkbox"/>	ALM
UNKNOWN	EBAY.6.1.2	00012345	<input checked="" type="checkbox"/>	ALM
[UNKNOWN]	EBAY.6.1.1	00002014	<input checked="" type="checkbox"/>	ALM
WINCHWEN	EBAY.6.1.1	00046814	<input checked="" type="checkbox"/>	ALM
UNKNOWN	EBAY.6.1.1	W143NES	<input checked="" type="checkbox"/>	ALM
WINCHWEN	EBAY.2.1.4	00046814	<input checked="" type="checkbox"/>	ALM

UNKNOWN	EBAY.2.1.4	W143NES	<input checked="" type="checkbox"/>	ALM

18.2 Build Release Notes

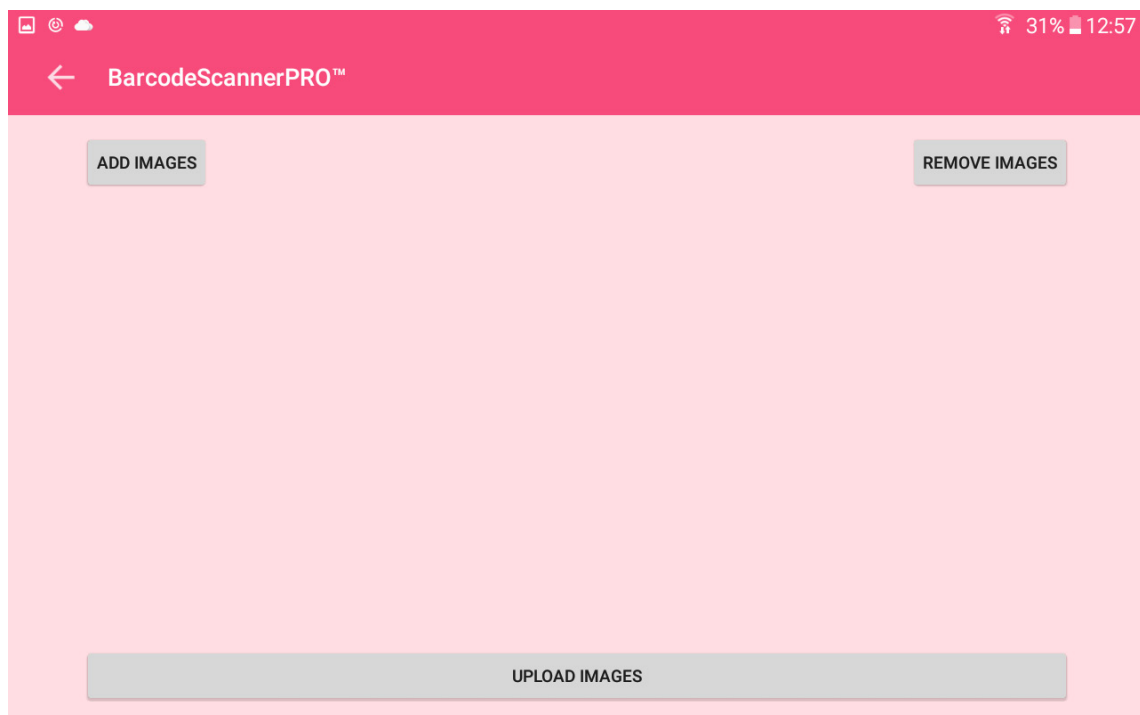

1. Barcode PRO- Edit Parts and Photograph Parts With Android App

The BarcodePRO app has been drastically improved to provide similar control over part information than what can be seen in the Pinnacle Professional Desktop application.

This includes the ability to edit, part information, part price, notes, and upload images.

The screenshot shows the 'BarcodeScannerPRO' app interface. At the top, there's a navigation bar with a back arrow and the app name. Below it, a tab bar has four options: 'PART', 'NOTES/LOG', 'ASSEMBLY', and 'PRESCRIBED PARTS'. The 'PART' tab is selected. The main content area is divided into sections: 'Pricing' with fields for 'Price' (40.00) and 'Cost' (0.00), and a 'GET PRICE' button; 'Vehicle' with fields for 'Stock Number' (00516065), 'Odometer' (0), and 'Engine Code'. Below these are several checkboxes: 'Use Mvr Details' (checked), 'Core Part', 'On Car', 'Assembly', and 'New Part'. At the bottom, there are three buttons: 'EDIT', 'SAVE', and 'CLOSE', along with a small image icon.

The screenshot shows the 'BarcodeScannerPRO' app interface for image management. It features a navigation bar with a back arrow and the app name. The main content area is mostly empty, with two buttons at the top: 'ADD IMAGES' on the left and 'REMOVE IMAGES' on the right. At the bottom, there is a wide 'UPLOAD IMAGES' button.
